

Rubberized Undercoating (aerosol)

Rubberized Undercoating (#117420) contains no asphalt and can be painted once cured. It is body shop safe and VOC-compliant (<40% by weight) in all 50 states.

Features & Benefits:

- Easy to apply aerosol formulation
- Fast dry formula cures in one hour
- Provides excellent coverage and adhesion which will not crack or chip under normal conditions
- Seals out rust, fumes, and climate changes
- Protects underbody areas while deadening sound
- Excellent for new panels, fender replacements, section repairs, weld joints and rust holes
- Also ideal for sealing leaks in gutters around the home
- Very black appearance will not fade due to UV exposure/will not brown out
- Flexible, paintable
- Easy clean up

Usage:

- Prepare surface by thoroughly cleaning and drying
- Shake can well before using
- Hold the can 10 to 12 inches from surface
- Spray the material in even coats (short and even strokes will produce the best results)
- Upon completion, invert the can and spray until valve is free of material to prevent clogging
- Consult SDS to determine proper PPE prior to use
