

MALCO[®] ACCELERATE ALL IN ONE POLISH & PROTECTION (2610)

DESCRIPTION

Malco Accelerate All in One Polish & Protection: is a one-step polishing compound designed to remove light to medium paint defects while leaving behind a slick waxed surface with lasting protection for up to 90 days. This all-in-one polish will quickly and easily remove swirls, imperfections and light scratches while leaving a deep glossy finish. Malco Accelerate offers a long working window and a dust free application. This can be applied with an orbital, rotary or by hand with a variety of foam pads or microfiber applicators. Malco Accelerate features easy removal allowing a full vehicle application before wiping off.

DIRECTIONS

Be sure to work indoors or in a shaded area out of direct sunlight if possible. For best results clean and decontaminate paint surface with Malco CW-37 or similar car wash and a Clay Wash Mitt before use. For extremely damaged surfaces a Heavy-Duty compound such as Tru-Grit or EPIC may be required for initial correction. SHAKE ACCELERATE WELL. Apply 4 medium sized drops of polish to pad and work in a crosshatch pattern until the compound turns from opaque to clear in a 2'x2' section. To ensure maximum protection, allow the product to flash or dry on the surface before removing with a microfiber (entire car may be polished prior to removal). If using an orbital polisher, apply at a low-speed setting, then buff at setting 5-6, if using a rotary polisher, apply at slowest speed and then buff between 1,200-1,400 RPM. If working by hand use a clean, soft applicator for best results. Accelerate can also be applied to the pad or directly to a panel with a trigger sprayer.

FEATURES AND BENEFITS

Water based formula allows for easy clean up	Remarkable gloss and shine for up to 90 days
Can be applied using an orbital buffer, rotary buffer or by hand	Long working window that provides ease of use for novices or experts

PACKAGE SIZES

946ml - 261032

MALCO® ACCELERATE ALL IN ONE POLISH & PROTECTION FAQ's

- What happens if I accidentally let Accelerate dry on my car?

Answer: No worries Accelerate will not become difficult to remove and is water based so simply is wipe it up with a damp cloth.

- Can you apply Accelerate outside in direct sunlight if you do not have a garage to work in?

Answer: Yes, Accelerate will be fine just be sure to keep your panels clean as you do not want any debris to affect the buffing process. And to make the clean up process easier, only complete on panel at a time.

- Can I put Malco's Epic CR2 over Accelerate Protect and Correct?

Answer: Yes, and it is recommended as it will maintain a protective coating to ensure your paint correction will last as long as possible.

- What is the best type of pad to use with Accelerate?

Answer: There are many options when it comes to pairing a pad with this product. The Malco EPIC Orange and Black pads, the Malco rotary blue foam pad, and the orbital white foam pad do well.

- Accelerate does not seem to be removing all of the scratches and imperfections I want it to?

Answer: This product is designed for light correction and polishing to refine paint. If your paint is heavily swirled or has deeper scratches, a true correction compound such as Tru Grit or EPIC Heavy Duty may be required previous to the Accelerate step.
