## CAR WASHING TECHNIQUE 101

We all know that anything even mildly abrasive adds micro scratches and swirls to your paint! To save the heart ache, we've put together the essentials when it comes to car washing technique.

### BEFORE YOU BEGIN

- Rinse and inspect your buckets and wash mitts to make sure they are free of all dirt and debris.
- Fill your wash buckets – one with clean water for rinsing and one with your soap mixture.
- Move your vehicle out of the sun and make sure the surface is cool to touch.
- Rinse entire vehicle to get rid of loose dirt and soil
- Pre-treat any heavily soiled areas (e.g wheels) as well as any bird dropping, bug splats or tree sap with **MALCO BUG OFF**.

### WASHING – HORIZONTAL SURFACES

- Begin with your vehicle's horizontal surfaces cleaning in straight lines starting with a left to right motion and finishing forward to back.
- Work in small sections and apply very little pressure to your **MALCO WASH MITT** and make sure you rinse your mitt often with the rinse bucket – NEVER back into the soap bucket!
- Rinse vehicle often to make sure the soap doesn't dry on the surface.

### WASHING – VERTICAL SURFACES

- Working from the top down
- If you come across heavily soiled areas, avoid the urge to apply more pressure as the harder you press the more likely you are to damage your vehicles paint.
- Re-treat stubborn areas with Malco Bug Off.

- For the final rinse, use a heavy spray OR remove the nozzle entirely and let the water sheet off the surface which will create less water spots.
- Inspect your **CHAMOIS** to be sure that it's free of dirt.
- Wet the chamois using clean water and ring out any excess moisture or you can even use a little **MALCO SHOWROOM SHINE** to add some additional lubrication.
- Keep the chamois as flat as possible and use broad, sweeping strokes to pull away as much water as possible.
- Finally, use a clean **MICROFIBRE TOWEL** to dry tight, hard-to-reach areas.
- Remember to remove the tag from your microfibre towels as they can also add scratches into your paint.
- Finish up with your Malco Showroom Shine and an additional microfibre to clean up any unwanted streaks or waterspots that might occur as water drips out of seams and body mouldings.
